Article 14126

- Immediately remove drained batteries from the product. Otherwise there is an increased risk of leaking.
- Always replace all the batteries at the same time. Check regularly that the batteries are not leaking.
- Regularly check batteries for leaks.
- Leaking or damaged batteries may result in burns upon contact with the skin; always wear suitable safety gloves!
- Remove batteries during extended periods of non-use.
- When inserting the battery ensure that it is inserted the right way round! This is indicated inside the battery cover. Batteries may otherwise explode.
- Do not exert mechanical loads to batteries.
- Avoid contact with the skin, eyes and mucous membranes. In the event of contact with battery acid, thoroughly flush the affected area with clean water and seek immediate medical attention.
- Avoid extreme environmental conditions and temperatures, e.g. above radiators as they may affect batteries.

- If necessary, clean the battery and device contacts before inserting the battery.

Start-up

Note: Remove the insulating strip [4] between the battery [7] and the battery compartment [2] before use. Verify the battery cover is closed all the way and push it closed, if necessary.

Securing the light

- Secure the light as shown in Fig. A.

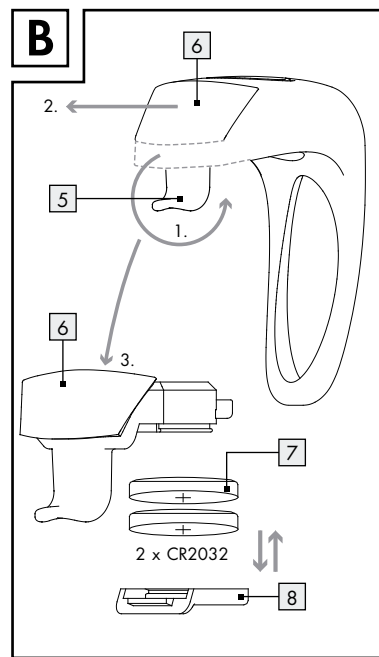

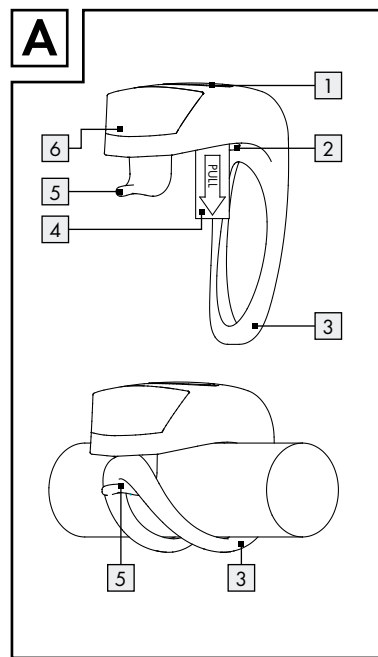

Switching the light on / off

- Push the ON / OFF switch [1] per the chart below to switch the lighting mode:

1 x	ON / side light
2 x	Flashing light
3 x	Interval flashing light
4 x	OFF

Replacing batteries

- Replace the batteries [7] as shown in Fig. B.
- 1. Pull the silicone loop under the bracket [5].
- 2. Pull the LED housing [6] forward and out.
- 3. Remove the black battery cover [8] and replace the two batteries. Ensure correct polarity according to Fig. B. Reassemble all parts in reverse order.

Cleaning and Care

- Never use harsh cleaning agents or abrasives to prevent damaging the material.
- Use a dry fluff-free cloth when you are cleaning or polishing the product.

Disposal

The packaging is made of environmentally friendly materials, which may be disposed of through your local recycling facilities.

Contact your local community or municipal administration for more details on how to dispose your worn-out product. Defective or used batteries must be recycled in accordance with Directive 2006 / 66 / EC. Return batteries and / or the device to the provided recycling facilities.

Never dispose of batteries in your household waste. They may contain toxic heavy metals and are subject to hazardous waste regulations. The chemical symbols of the heavy metals are: Cd = cadmium, Hg = mercury, Pb = lead. Therefore dispose of used batteries through your municipal collection site.

LED Light Set

Introduction

Many congratulations on the purchase of your new appliance. You have selected a high quality product. The operating instructions are to be considered as part of this appliance. They contain important information about safety, use and disposal. Before using the product, please familiarise yourself with all the safety information and instructions for use. Use the product only as described and for the indicated purpose. If you pass the appliance on to anyone else, please ensure that you also pass on all the documentation.

Intended use

This product is suitable for universal use, e.g. for recreation, camping, outdoor and bicycles. Observe national regulations for road traffic use. This product is not suitable for commercial purposes and may only be used for the recommended application. This product is not suitable as residential room lighting.
